C. Miscellaneous
Ratio of Dental Hygienists to Dentists in FQHCs  
[Item #3]
Dr. Kasee Metcalf, Chief Dental Officer for Western NC Community Health Services requested clarification on 90-233 (b), which states, “a dentist in private practice may not employ more than two dental hygienists at one and the same time who are employed in clinical dental hygiene positions.” Since FQHC’s are 501(c)(3) corporations and are not engaged in the private practice of dentistry the ratio is discretionary. However, the supervising dentist is responsible for any standard of care issues that may arise based on the number of hygienists that he/she is supervising.

Universal Licensure Recognition Act  
[Item #4]
Mr. White provided an update on Senate Bill 545, which was introduced on April 5, 2021. This Bill is an act to provide a universal recognition process for licensure, certification, or registration for individuals who establish residence in this state.

Attorney General Opinion
On August 14, 2015, the Board received an opinion from the Attorney General regarding whether licensed North Carolina dentists may perform procedures that are primarily designed to improve a patient’s appearance rather than the function or health of their teeth and jaws, without obtaining some additional license or training. The Attorney General concluded that North Carolina dentists should not be performing such procedures absent a medical license separate and apart from their dental license.

Since the time of that opinion, there have been peer reviewed articles indicating that Botox can be used to treat certain dental conditions. Mr. White will draft a response to the Attorney General’s office asking if this new information changes the original opinion. The Executive Committee will review and approve the response prior to his sending.
