VIII. NEW BUSINESS
A. Local Anesthetic Question [Item #3] Mr. White
Dr. Paul Kazmer submitted an inquiry to the Board asking if a dental hygienist properly trained and certified to administer local anesthetic, would be allowed to inject Exparel. Following a discussion, the Board opined that a dental hygienist who is properly trained and certified may inject Exparel under the direction of dentist the same as any other local anesthetic.

B. Supervision of Dental Hygienists [Item #4] Mr. White
The Board received an inquiry regarding implementing a staggered hygiene approach whereby midway through a patient’s treatment, the hygienist transitions from acting as a hygienist to acting as a dental assistant, therefore allowing another hygienist to begin hygiene duties so that the dentist to hygienist supervision ratio remains at two. The Board determined that offices cannot stagger duties under this scenario, once a hygienist begins a prophylaxis appointment, he/she is practicing as a hygienist for the entirety of that patient’s appointment and may not transition from acting as a hygienist to a dental assistant mid-appointment. However, once the appointment is concluded, the hygienist may begin non-clinical duties allowing another hygienist to begin clinical duties and thereby maintain the appropriate supervision ratio.

C. Standard of Care Question [Item #5] Mr. White
The Board received a question regarding the current standard of care for taking post-seating radiographs after the completion of every crown. Following a discussion, the Board opined that post-seating radiographs are not required for every crown procedure; however, an image should be taken if a clinical evaluation of the crown reveals questionable seating.
